Centroids per fold. Each block is one SSN family.
Alpha/beta hydrolase
309 (75%), 36 families
L-amino peptidase D-ALA esterase/amidase
45 (11%), 1 family
Amidase signature (AS) domain
19 (5%), 1 family
Oxygenase MpaB family protein
10 (2%), 1 family
DD-peptidase/beta-lactamase superfamily
5 (1%), 4 families
Trypsin-like serine proteases
5 (1%), 2 families
Peptidase S8/S53 domain
5 (1%), 1 family
Cytochrome c-like domain
3 (1%), 1 family
Cupredoxins - blue copper proteins
2 (<1%), 2 families
SGNH hydrolase
2 (<1%), 1 family
Peroxidase, domain 2
1 (<1%), 1 family
Cytochrome P450
1 (<1%), 1 family
Acid Proteases
1 (<1%), 1 family
Glycoside hydrolase/deacetylase
1 (<1%), 1 family
Purple Acid Phosphatase
1 (<1%), 1 family
DD-peptidase/beta-lactamase superfamily (unconfirmed)
1 (<1%), 1 family
